#### Introduction

This is an index of the contents of each of the 60 card packs which make up Sally Kaicher's Card Catalogue. It is designed to allow those attempting to collect entire sets to monitor their progress. An alphabetical index of the Catalogue by species name is already available on the same website as this one.

#### Notes

- Cards are listed here in numerical order, with the packs ordered as originally published; where the original author's number modifications are available, these have been adopted. In order to use this index as efficiently as possible, owners of cards are recommended to store them by pack, in numerical order. In order not to preempt any of the revisions of the Card Catalogue currently in preparation, no attempt has been made to correct spellings (even where there are clearly typographical errors) or to revise classification. Kaicher's own subsequent modifications to generic placement are similarly not incorporated here.
- In the case of 'replacement' cards, Kaicher gave the card a series number as well as the number of the card it was to replace. These are listed by series number here, so readers should be aware that in some cases the same species appears on two different cards.
- Some card numbers were duplicated in subsequent packs; these numbers are reproduced here as published. Readers should note the differing pack numbers.
- Where question marks or quotation marks are attached to names, these are from the original author.

- This file is also available in ASCII text-only format. This is to keep its size down for fast downloading, and to allow it to be supported by the largest possible number of different computer/software combinations. No character or paragraph formatting is present in the text-only version.

In the set from which this index was compiled, the following cards were not found: 684, 708, 1065-1075, 1328, 1542, 1590, 1593, 1681, 2009, 2178, 2275, 2303, 2687, 2733, 2906, 2990, 3013, 3214, 3239, 3346, 3412, 5047, 5660, 5661, 5757. Some of these are known to have been withdrawn and destroyed between printing and dispatch. The author would be most grateful for details of any cards listed here which are still in existence.
